

WHO WE ARE?

We are students fascinated by technology and the world around us!

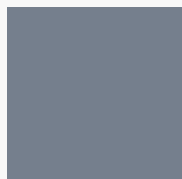

Oto nasza drużyna:

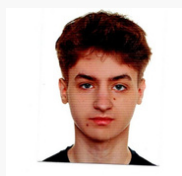

Jakub Wieczorek
Team Leader

Grzegorz Rosoliński

Tomasz Leszczyński

Jakub Gerek

Roman Lesiuk

Aleksander Dobosz

WHAT WE DO?

We're building CanSat—a mini satellite the size of a soda can. It collects atmospheric data and conducts a mushroom research mission. We simulate a real space agency as part of an international competition:

WHAT WE ARE LOOKING FOR - AND WHAT WE OFFER

A young team with a passion for innovation is looking for a partnership for the CanSat project. We need technical support (consulting, components, materials). In return: promotion of your company on social media, in reports and presentations! Join us in space!

Our Project Coordinator:

Janusz Lejtan

Current project partners:

A place for
your
business!
